

PCI Express Card > Hybrid 1 x internal SATA 6 Gb/s + 1 x internal mSATA

Description

The PCI Express card by Delock expands your PC by one SATA 6 Gb/s port and one mSATA port. The card offers a hyperduo function. With this function you can combine a mSATA module and a HDD to use the advantages of both data mediums. The speed of a SSD and the capacity of a HDD. The card also supports the common NON-RAID, RAID0 and RAID1 functions.
